Robert Bronwasser & HENDI team up:

## Design must be functional and bring a smile to your face!

HENDI teamed up with Dutch industrial designer Robert Bronwasser who has previously already worked for renowned brands like Heineken and Lipton and won numerous awards for his outstanding designs. The goal of this collaboration is to reimagine the HENDI product assortment and to create the function- and design-wise best possible Tools for Chefs.

### Design with a smile!

Robert started with analysing our products and how they met the needs of the users. His findings were clear, 'Chefs want control over their tools, they need to be able to see which setting a machine is at - at any time and even from the other side of the kitchen. They prefer manual buttons over digital ones and they must always be instantly usable, also with wet or greasy hands. They also like design but it should always be functional.'

With this in mind Robert presented his first sketches and models. The freshness and decisiveness of his design immediately grabbed our attention. As an example, the knob, one of our most recognisable design elements, was toned down with a textured surface for extra grip and a highly visible green line, so it's always clear how the appliances are set. Next to the knobs and grips Robert also worked on designing a stick blender, a chef's torch, a range of hot drink boilers and percolators, and most recently a new line of milkshake mixers. The results exceeded our expectations, once again.

Especially the new range of milkshake mixers represents a distinctive eyecatcher and manages to easily spice up every restaurant, bar, or breakfast buffet. With the sleek design, the stylish matte finish, and a clever mix of stainless steel and plastic components timeless classics have been created.

## MILKSHAKE MIXER - DESIGN BY BRONWASSER

Designed by Dutch Designer Robert Bronwasser and available in 6 attractive colours.

Make Freddo cappuccinos, Frappés and of course milkshakes without effort.

The housing is made from ABS plastic.

The base is weighted for extra stability and is fitted with rubber feet.

The motor can spin the agitator disc at two speeds, 15.000 and 19.000 RPM.

Control the milkshake mixer with the two-speed switch on the top which is easily accessible.

The milkshake mixer is fitted with a micro switch so it can only operate when the cup is properly placed.

Choose between two different agitators to control the level of aeration.

Very complete, comes with a stainless steel mixing cup (0.95 liter) and polycarbonate mixing cup (0.9 liter) and 2 sets of 2 agitators.

Cups and agitators are dishwasher safe.

### CHEFS TORCH - DESIGN BY BRONWASSER

Designed with chefs in mind by Robert Bronwasser. This crème-brûlée is a pleasure to use thanks to the stylish matt black design with green accents and the ergonomic grip. The burner is easily and securely attached to the gas cartridge and covers the whole top of the cartridge, this is also very hygienic. The piezo ignition makes it easy to ignite, the large gas dial allows for easy adjusting the flame size and intensity. This burner can operate in every angle, even upside down, thanks to the improved design of the burner that prevents flaring.

## TRAY SEALER MANUAL

Intended for packing food and other products in single use plastic trays, suitable for hot or cold food. Seals all kinds of trays, the tray matrix can be switched for different sizes of matrixes. Can seal trays to a size of 235x190x(H)155 mm, and cups to a height of (H)170 mm. Supplied with an aluminum alloy matrix for 227x178 mm (805572) trays, without division. Other sizes available separately. Durable stainless steel construction. Ergonomic handle is made of damage-resistant plastic. Sealing plate is fitted with a spring mechanism, easing opening after sealing. Sealing temperature can be set from 50° up to 210°C. Fitted with powerful heaters, warm-up time is just 8-10 minutes and sealing time only 1-3 seconds. The sealing plate is covered with a non-stick coating, this prevents the foil from sticking after sealing. The sealing plate acts as a pressure damper. When locking the sealing plate, the pressure is spread evenly across the edge of the container, preventing breakage and eliminating microcracks, reducing leaking. Build-in retractable knife, cuts the foil right behind the sealed container. The foil dispenser is universal for rolls up to 187 mm wide, can fit rolls with a max. diameter of 170 mm. Fitted with a foil tensioner, ensuring tightly sealed foil without curls and creases. Very safe thanks to the use of an overload fuse, overheating protection and backlit switch. The non-slip feet are very stable and protect the tabletop from scratching. With detachable 1.5 m power cord with earthed plug. Net weight: 10 kg.

### XANT

This stainless steel power grill has 4 detachable legs which can be re-packed into a compact unit for transport. The burners develop a high temperature in the windproof unit and therefore this barbecue is suitable for high volume production. The unit itself is easy to clean thanks to these high temperatures. The two burners can be operated independently. Fitted with a thermocouple and electronic ignition, gas hose and pressure regulator are included. Suitable for propane gas. Grid surface area 540x540 mm (2 grids of 540x270 mm).

code	-	mm

### INFERNO GAS GRILL

The Atlanta has excellent cooking properties due to the optimal heat distribution and hot air circulation inside the burner enclosure. The high temperature sears meat evenly and quickly, reducing adhesion to the grid even when the grid hasn't been greased. The 3 separately adjustable transverse burners have thermocouple security and electronic ignition. The burner assembly is made entirely of stainless steel and the grids are removable for easy cleaning. The three burners also allow the surface to be divided in separate heat zones for simultaneous cooking of meat, vegetables & fish. The Atlanta has a completely black epoxy coated frame with four castor wheels and a secure gas bottle holder. Thanks to the deep gas bottle holder you can place the gas bottle safely under the barbecue. Griddle surface: 1100 x 500 mm.

### EUROPA GAS GRILL

The Europa 3 has excellent cooking properties. The high temperature sears meat evenly and quickly, reducing adhesion to the grid even when the grid hasn't been greased. The three, separately adjustable, lengthwise burners have thermocouple security and electronic ignition. The Europa 3 has a completely black epoxy coated frame with four wheels, two of which are castor wheels, and a secure gas bottle holder. Grease which is drained from meat during cooking is led through a special channel to a grease collector. Thanks to the deep gas bottle holder you can place the gas bottle safely under the barbecue. The Europa 3 is supplied complete with lava rocks and a roasting pan.
